## OPIATE USE

Given the rapidly increasing rate of opiate related death and the success reported using or replacing opiates with cannabis; the VCBC accepts opiate use as a condition for membership.

### **We accept the following as a Proof of Condition for Opiate Use:**

- ❑ A prescription bottle or receipt for a **triplicate** opiate such as oxycontin, morphine or methadose.

## WHY DO WE NEED A PROOF OF CONDITION?

In Canada, you have a right to take or refuse whatever medicine you chose to treat your health condition; whether or not to use chemotherapy to treat cancer is an example of patients exercising this right.

At The VCBC, We believe in this right and the need for access to safe, medicinal cannabis and cannabis products. Despite this, we have been raided more than once; we beat the charges every time.

Being able to prove that everything we have ever sold has been strictly to medical patients, protects us and allows us to operate regardless of the state of the current laws.

## ONCE WE HAVE ALL YOUR INFORMATION, COME IN AND SIGN UP!

- Sign ups include a product and facility orientation - Approx. 10-15 minutes
- Please come with your paperwork and ID ready to go
- We will do our best to accommodate you right away but we may need a few minutes to shuffle staff around

By appointment, we would be more than happy to provide:

- an in depth orientation for those with little experience using cannabis
- Sign ups at home or over the phone for those with conditions that limit their mobility

## CONDITIONS THAT REQUIRE A DOCTOR'S

### RECOMMENDATION

- Schizophrenia
- Depression

There have been studies published suggesting that cannabis can have a negative effect on depression and schizophrenia.

As the safety of everyone at VCBC, **including yourself** is our top priority, We require a doctor's recommendation as a precaution.

## WHY NOT PRESCRIPTION BOTTLES?

We do not accept prescription bottles as a proof of condition for membership.

**We do not have the medical qualifications required to evaluate a condition based on a prescribed medication.**

**There is only one exception to this rule, triplicate opiate use.** This exception is made strictly for these medications due to the level at which they are controlled.
