

Coconut Massage Oil - Cocos nucifera
Organic coconut oil infused with at least 3 different kinds of dried cannabis leaf that has been thoroughly quality inspected.

- ❖ Coconut oil absorbs quickly and completely when applied, leaving skin soft and moisturized.
- ❖ Same medicinal qualities as our regular massage oil.
- ❖ No vitamin E makes this our only topical product you can use as an edible.

Salves (50mL) - All our salves are made by adding beeswax to regular massage oil and specific natural infusions. The added wax keeps the oils in place, providing long-term topical effects while simultaneously reducing the mess associated with topical use.

DO NOT USE THESE PRODUCTS IF PREGNANT OR BREASTFEEDING.

Regular Salve - regular massage oil, organic beeswax

- ❖ Pain reliever, muscle relaxant, and anti-inflammatory.
- ❖ May help relieve many skin conditions including eczema, psoriasis, and atopic dermatitis

Aloe Vera Salve - regular massage oil, organic beeswax, aloe gel, crystallized vit. C, lavender essential oil

- ❖ Traditionally used topically to heal wounds, various skin conditions and to help heal burns and abrasions.

Arnica Salve - regular massage oil, organic beeswax, arnica oil infusion

- ❖ Long lasting

DO NOT USE ON BROKEN SKIN

Green Lion Salve - regular massage oil, organic beeswax, eucalyptus, tea tree, wintergreen, lavender, cinnamon, peppermint essential oils

- ❖ Soothing heating and cooling effects when applied as a deep muscle rub.
- ❖ May help with inflammation and soft-tissue pain.

DO NOT USE ON BROKEN SKIN

Cannapatch - grape seed oil/olive oil, at least 3 kinds of cannabis leaf and then packaged in cheesecloth.

- ❖ Pain reliever, muscle relaxant, and anti-inflammatory
- ❖ Long-lasting direct application for hours of continually medicated symptom relief.
- ❖ Can be used at freezer temperature to reduce swelling, fridge temperature to relieve the heat and burning associated with skin conditions, or at room temperature for extended muscle relaxation and analgesia.

NOTE: May stain sheets and clothing

Lip Balms (4.5mL) - regular massage oil, shea butter, organic beeswax, crystallized vit. C

- ❖ Moisturizing and convenient

Cannabis infused oils can be analgesic, antifungal, antimicrobial, antibiotic, and antiseptic when applied to the skin.

Because these products target the area they are applied, they require significantly lower blood levels of the active ingredients to achieve symptom relief. Our topical products are generally non-psychoactive.

Topical applications are quick acting, usually taking effect within the first 5 minutes of use.

We have combined some of our cannabis oils with those derived from other medicinal plants, providing our members with access to traditionally used treatments for a variety of chronic illnesses.

Regular Massage Oil (120ml) - olive oil, cannabis leaf, vit. E.

- ❖ Pain reliever, muscle relaxant, and anti-inflammatory.
- ❖ May help relieve many skin conditions including eczema, psoriasis, and atopic dermatitis.

The following products are a 1:1 mixture of our regular massage oil and olive oil infused with the respective natural plant source. If possible, consult your physician before beginning to use any of our naturally-derived oils.

St. John's Wort - Hypericum perforatum

- ❖ May help ease the symptoms of endometriosis
- ❖ Traditionally used to strengthen the circulatory system.
- ❖ May help with all aspects of bruising, including easing pain and facilitating reabsorption of the bruise without clotting.
- ❖ Has been shown to strengthen capillaries and veins, which may be helpful for those with compromised livers and other circulatory diseases.

Although relatively small amounts of St. John's Wort reach the blood when applied topically, this herb does interact with a wide variety of prescription medications, so close watch should be kept for the occurrence of undesirable side effects.

Arnica - Arnica montana

- ❖ May reduce inflammation and pain caused by arthritis, fibromyalgia, and lupus.
- ❖ Stimulates circulation and intercellular fluid exchange which may reduce tissue damage and speed recovery of a variety of skin and muscle ailments.

Arnica has been shown to slow blood clotting. This means that anyone who is taking blood thinning or clotting medication should avoid this product.

Comfrey - Symphytum^x uplandicum

- ❖ Also known as knitbone, Comfrey has been used traditionally to treat traumatic tissue and bone injuries.
- ❖ Contains the small organic molecule allantoin, which may stimulate cell growth and repair while simultaneously depressing inflammation.

The constituents of comfrey can, in larger amounts, be damaging to the liver. Individuals with any form of liver disease or who take medication for the liver are advised to avoid this product.

The following products are made by combining our regular massage oil with essential oils.

Peppermint & Eucalyptus - Mentha ^x piperita, Eucalyptus globulus

- ❖ Soothing heating and cooling effects when applied to the chest which has been traditionally used as a symptomatic treatment of a variety of lung irritations.

Camphor - Cinnamomum camphora

- ❖ Soothing heating and cooling effects when applied to the chest
- ❖ Used as a symptomatic treatment of a variety of lung irritations.
- ❖ May improve circulation.
- ❖ May be helpful for stomach and bowel complaints.
- ❖ Traditionally used topically in the treatment of swelling and inflammation
